

Job Title:

Software Development Engineer

Who we are and what we offer you

Pinnacle is a trusted guide and expert partner of the world's leading law firms. We help our clients get the most from their critical business applications and the data these applications hold. We also have long-standing partnerships with both Thomson Reuters Elite and Intapp. We work alongside them to develop products that give our clients the maximum value, opportunity and advantage.

Our sole focus is on the legal sector and the specific technologies law firms depend on. This means we deliver projects faster and better than if we had a more general focus.

As a leading global consultancy, we work on projects with the top 100 law firms both in the UK and internationally. We're experiencing rapid growth so are looking for new talent in systems consulting.

Your role

The Pinnacle Development team designs, builds and tests its own software products. These range from data utilities to applications – all to provide our clients in the legal sector with additional and useful software functionality.

We are looking for ambitious developers to join our development team in South West London. The job will entail:

- ▲ Involvement in architectural, database and user experience design
- ▲ Producing robust code from specifications and designs
- ▲ Coding in Angular using a variety of libraries including Telerik.
- ▲ Use of the Microsoft stack, including SQL Server, to create .NET web services
- ▲ Carrying out unit and system testing
- ▲ Production of documentation
- ▲ Making innovative contributions
- ▲ Working as part of a team
- ▲ Continual learning with support from the team

With a competitive salary and benefits package that reflects the skills and experience of a candidate in the early part of their career (just graduated or with up to c3 years' experience).

Is this you?

While it may be useful to have worked in the professional services sector, it is not essential. What is essential is a passion for high quality development work allied with the skills necessary to ensure that it is delivered consistently and to delight our clients with what we do.

We regard the following attributes as essential:

- ▲ Degree standard education (preferably in maths, science or technology)
- ▲ Angular development experience and at least a working knowledge of MS Windows, SQL server and .NET
- ▲ Mental sharpness
- ▲ Ability to work proactively, without close supervision, and exercise sound judgement
- ▲ Excellent English language verbal and written communication skills
- ▲ Good organisational and analytical skills with an attention to detail
- ▲ High moral and professional standards
- ▲ Honesty with a record testifying to good character
- ▲ Flexibility to switch between projects according to business priorities
- ▲ Ability to learn new skills quickly and efficiently

What we offer

We offer career opportunities and attractive packages (competitive salaries, benefits, incentives and a profit share scheme) to both new and experienced consultants and developers who share our ambition to be the best at what we do. We have a strong professional culture in which we value the hard work required to achieve high levels of client satisfaction. In short, we encourage ambition and reward success.

The next steps

Please email your CV to suzanne.stubbings@pinnacle-oa.com with a note of introduction that will persuade us to invite you in for a chat.

We look forward to hearing from you.
