

Job Title:

Trainee Business Intelligence Developer

Who we are and what we offer you

Pinnacle is a trusted guide and expert partner of the world's leading law firms. We help our clients get the most from their critical business applications and the data these applications hold. We also have long-standing partnerships with both Thomson Reuters Elite and Intapp. We work alongside them to develop products that give our clients the maximum value, opportunity and advantage.

Our sole focus is on the legal sector and the specific technologies law firms depend on. This means we deliver projects faster and better than if we had a more general focus.

As a leading global consultancy, we work on projects with the top 100 law firms both in the UK and internationally. We're experiencing rapid growth so are looking for new talent in systems consulting.

We'll give you training specific to our industry and the opportunity to work in a stimulating and supportive working environment.

Your role

As a Trainee Business Intelligence developer, you'll learn how to implement and configure business intelligence solutions. Once trained you'll support client implementation teams at international law firms. Under the guidance of your Pinnacle team leads and mentors you can look forward to contributing to the successful deployment of enterprise systems.

Your key responsibilities will be to:

- ▲ Learning to develop intuitive and insightful reports and dashboards
- ▲ Using SQL – learn how to manipulate data from source system
- ▲ Gain subject matter expertise in the systems we work with; Power BI and associated technologies

Is this you?

Rather than a definite Pinnacle 'type', we're looking for someone who is a winning blend of all the talents. So we're never overly prescriptive in what we ask for.

You should already be working in a trainee business intelligence development role, we're really looking for a good mix of aptitude and attitude. For this role, that means problem-solving skills and a logical approach to challenges together with determination and an eagerness to learn.

Any of the following would also be an advantage:

- ▲ Technical degree, ideally in computing or maths or equivalent experience
- ▲ Understanding of report development and user experience
- ▲ Knowledge of the legal industry

Our essential criteria

To be successful in your application you need to:

- ▲ Have a great attitude towards learning

The role will be based in Moncton, Canada

The next steps

Please email your CV to helen.mcconnon@pinnacle-oa.com with a note of introduction that will persuade us to invite you in for a chat.

We look forward to hearing from you.
