

Increase Your Firm's Profit With Time Policy Manager

Time Policy Manager is an automated solution to the issue of lost time. It drives behaviors towards prompt time recording, giving you the opportunity to improve billing cycles, cash flow and profitability.

10 - 12 days average implementation period

Ongoing technical support and personalized care from a dedicated account manager

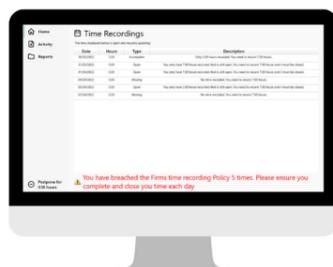

Entirely customizable around your preferences

Maximize Revenue

Time Policy Manager is designed to complement your existing policy and time recording system. It helps you to maximize the revenue you can achieve by ensuring that every unit of time is accounted for accurately.

Say Goodbye to Lapse Time Recording

People can't put off time recording beyond your policy's requirements, otherwise Time Policy Manager will minimize all applications other than the time recording software. Timekeepers have a limited number of opportunities to postpone this when urgent deadlines are looming.

Completely Customizable

Enforce multiple policies at the same time, choosing who is monitored and when based on a range of different facts. Customize the language of the pop-up, messages, sanctions, number of postpones and how you report on time policy breaches.

Tailored to Your Policies

It fits the requirements of your specific time recording policies, taking into account the different working arrangements of your teams and the different geographies or time zones they work in.

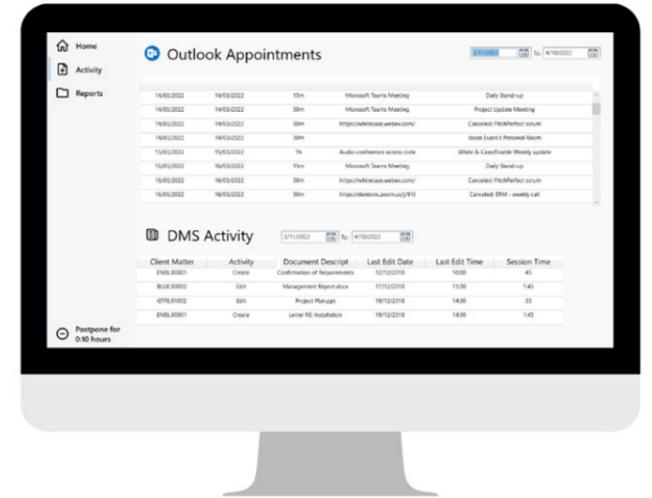

Integration With Your Systems

Time Policy Manager works with all major time recording systems, including Carpe

Diem, Intapp Time and other browser-based systems such as Elite 3E Time. It can also be connected to your DMS and Outlook Calendar to make suggestions about what to record time against.

Dynamic Reporting Abilities

You can see firm-wide time recording activity and filter these to dynamic reports by individual, location, problem, last login or policy breach.

Success Stories From Existing Clients

"We immediately gained a better knowledge of the split between chargeable and non-chargeable activity, and a far more accurate picture of business performance at any point in time."

Adam Vosper, Head of Revenue and Credit Control, Charles Russell Speechlys

"We recently had a successful roll out of Time Policy Manager across our firm. We have been able to see tangible results from the outset and look forward to continuing to work with the Pinnacle team."

Richard Peacock, Finance Systems Manager, Trowers & Hamlins
